# Product Portfolio

# Who are HFR Solutions?

HFR Solutions are a Community Interest Company founded in 2012 who are ISO-accredited and specialise in emergency response and workplace safety. We work closely with organisations, businesses and communities to help #PlanPrepareRespond in the event of an emergency, whilst complying with all legislation.

The Solutions team is comprised of individuals from backgrounds including Fire Service, Police and Ambulance. Our people are passionate and committed about helping individuals maintain their competency levels and high standards of health and safety.

We deliver a wide range of consultancy, emergency response and training solutions to various businesses, individuals and communities.

HFR Solutions work with a variety of organisations, from public and private sectors. Each have their own set of challenges, emergency procedures and site-specific risks.

We are accredited at ISO9001, ISO14001, ISO45001, IOSH, GWO, Highfield, SIA and CITB standards.

As a Community Interest Company, our profits are reinvested into initiatives and projects that match our vision and make a real difference to local communities. We are proud to be able to give back and constantly strive towards making the Humber region a safer place to live and work.

# 01. Community Return

**Making the  
Humber region  
a safer place to  
live and work**

Community Interest Companies are designed for enterprises to use their profits for the public good. As a CIC, our profits are invested into community initiatives and projects that align with our vision.

We are proud to be able to give back and constantly strive towards making the Humber region a safer place to live and work.

We can support your organisation's Corporate Social Responsibility by investing in a diverse range of community initiatives and projects including: emergency management and emergency response services, consultancy and workplace safety training.

## 02. Emergency Rescue Teams

An Emergency Rescue Team (otherwise known as Emergency Response Team or Incident Response Team) will provide emergency and medical intervention during higher risk activities. Rescue teams will ensure you reach your legislative compliance.

The competence and capability of a rescue team to appropriately intervene in a crisis with the correct skills, knowledge and equipment is vital to safely and effectively deal with an emergency incident. Our experienced teams will deliver onsite response to control and mitigate risk to site and personnel.

Our rescue teams have experience dealing with fire, rescue and medical emergencies and carrying the latest rescue and medical equipment to resolve any emergency.

Our team have assisted numerous organisations with their rescue planning and preparedness including British Steel, PX and Orsted.

## 03. Consultancy

The safety of you and your employees is paramount and remains our main focus. We aim to equip your business and industry with the relevant skills, expertise and competence to implement safe systems of work and operate safely.

Our team can assist your organisation with a medical needs assessment which will identify your needs in relation to the following:

- Health and Safety Executive (HSE) Legal Requirements
- First Aid Training
- Medical Risk Assessment
- Equipment Needs

We can supply a range of high-quality equipment for:

- Fire Safety
- Medical and First Aid
- Personal Protection Equipment (PPE)
- Rescue Equipment

Your workers will have confidence that they are using high-quality products suitable for the tasks they undertake.

## 04.

# Risk Assessments & Rescue Plans

## Risk Assessments

Our teams can identify and evaluate any potential risks in your workplace and will provide a bespoke risk assessment; all of which appropriate recommendations to mitigate risks.

This will include:

- Fire Risk Assessments
- Confined Space Risk Assessments
- Working at Height Risk Assessments

## Rescue Plans

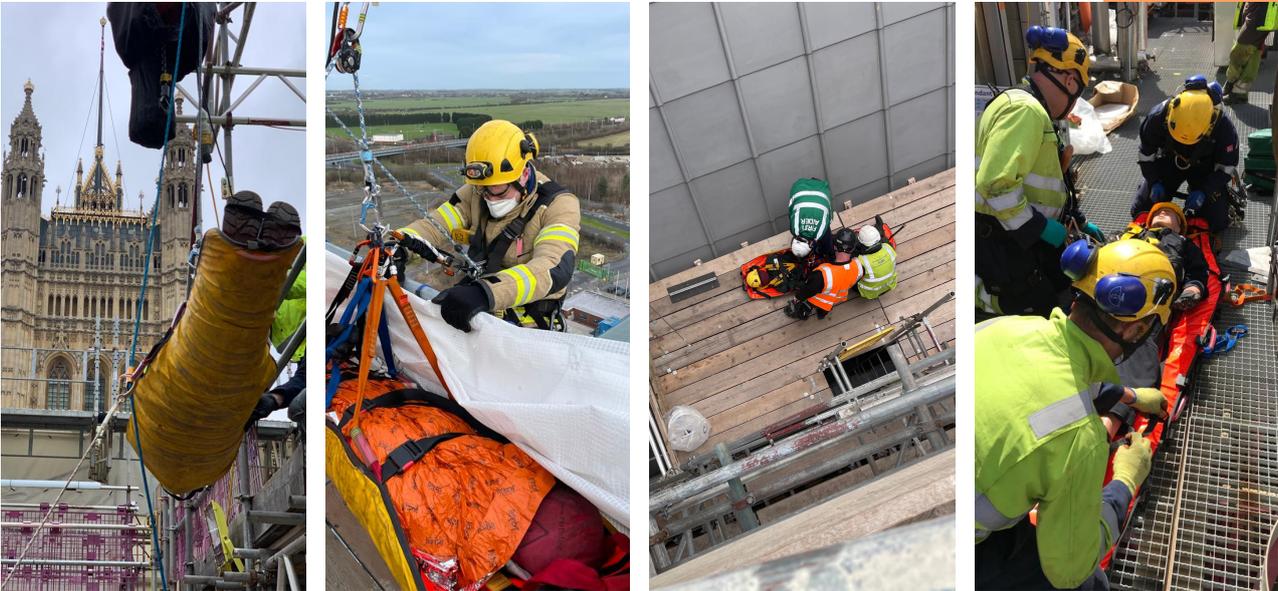

It is important that your rescue plan is suitable, sufficient, and effective so those that need to be rescued can be quickly and safely recovered without putting anybody else at risk.

Our Emergency Rescue Team will examine your rescue plans and assess whether the level of risk changes as a project develops. This will test if your organisation holds the competency levels to execute all phases of the rescue plan.

RISK ASSESSMENTS
